Programming Cloud Services for
Android Handheld Systems: Spring

Batis Abhari

Smart Contract Technical Lead | Senior Solidity Engineer |
Blockchain Security & DeFi | EVM | Technical Leadership
Calgary, Alberta, Canada

Summary

Hands-on Smart Contract Technical Lead and Senior Solidity Engineer with 7+ years of blockchain and Web3 experience, backed by extensive software engineering and technical leadership experience. I specialize in designing, developing, deploying, reviewing, and integrating Solidity smart contracts across EVM-compatible networks, with a strong focus on DeFi, blockchain security, protocol architecture, and production reliability. My experience includes smart contract development and deployment for the CrowdSwap DEX ecosystem, blockchain backend integration, security analysis, automated auditing tools, crypto trading infrastructure, and technical leadership across distributed engineering teams. Core areas: • Solidity, EVM, Smart Contract Architecture • DeFi, DApps, ERC-20 / ERC-721 / ERC-1155 • Smart Contract Security, Auditing, Debugging • Hardhat, OpenZeppelin, Tenderly, Etherscan • Python, Django, TypeScript, Node.js • Blockchain Backend Integration • Technical Leadership, Architecture, Code Review, Team Guidance I remain hands-on with development while also supporting architecture, technical decision-making, code quality, security, and team delivery. Open to remote opportunities as a Smart Contract Technical Lead, Senior Solidity Engineer, Blockchain Security Engineer, Technical Consultant, or project-based blockchain specialist. International remote, contract, freelance, part-time, and full-time engagements are all of interest.

Experience

SmartThinking

Smart Contract Technical Lead | Senior Solidity Engineer
June 2024 - Present (2 years 5 months)

Dubai, United Arab Emirates

Leading blockchain and smart contract development with a hands-on focus on Solidity, EVM architecture, security, and technical delivery.

- Design, develop, review, and deploy Solidity smart contracts for EVM-compatible networks.
- Build blockchain security and auditing workflows, including AI-assisted analysis and automated threat detection.
- Design and implement Web3 backend integrations using Python, TypeScript, Node.js, and related infrastructure.
- Develop blockchain automation and trading systems, including crypto market and execution tooling.
- Provide technical guidance on smart contract architecture, security practices, and blockchain system design.
- Lead technical decision-making while remaining directly involved in development, debugging, review, and delivery.

IT-Street GmbH

Senior Blockchain & Solidity Developer

November 2022 - March 2024 (1 year 5 months)

Cologne, North Rhine-Westphalia, Germany

Worked as a senior blockchain developer on CrowdSwap, a DeFi DEX aggregator supporting swaps and cross-chain functionality across EVM networks.

- Developed, integrated, and deployed Solidity smart contracts for the CrowdSwap ecosystem.
- Contributed to DeFi swap and cross-chain functionality across multiple EVM-compatible networks and Layer 2 environments.
- Performed smart contract debugging and on-chain transaction analysis using Hardhat, Tenderly, and Etherscan.
- Worked with TypeScript and backend services to integrate smart contracts with distributed application infrastructure.
- Participated in code review, testing, deployment, and troubleshooting of blockchain components.
- Collaborated remotely with engineering teams on production DeFi features and system reliability.

Project:

CrowdSwap —> <https://crowdswap.org>

Freelance

Blockchain & Smart Contract Consultant

May 2019 - December 2022 (3 years 8 months)

Provided blockchain development and technical consulting for Web3 and smart contract projects.

- Designed and developed Solidity-based smart contracts and blockchain application components.
- Advised clients on blockchain architecture, security requirements, access control, and implementation strategies.
- Researched Ethereum, Bitcoin, EVM networks, scalability, and blockchain security approaches.
- Supported backend integration using Python, Django, Node.js, databases, and API-based services.
- Reviewed blockchain solutions for technical feasibility, security, and deployment requirements.

T-Top

Technical Lead & Senior Software Engineer

October 2020 - November 2022 (2 years 2 months)

Tehran Province, Iran

Led technical design and software delivery across backend, blockchain, and distributed application projects.

- Led engineering activities for web and backend systems using Python, Django REST Framework, PostgreSQL, and Docker.
- Designed scalable distributed architectures and supported deployment across multiple servers.
- Designed a blockchain-based supply chain DApp and defined its smart contract and application architecture.
- Guided developers through technical planning, code review, debugging, and delivery.
- Applied Agile and Scrum practices to improve team coordination and development workflow.

Azaran Setareh Tirazees

Technical Lead & System Architect

December 2018 - June 2020 (1 year 7 months)

Shiraz

Led software architecture and technical delivery for web-based business applications.

- Designed and implemented backend systems using Python, Django, and relational databases.
- Designed application architecture, database structures, and system integrations for business platforms.

- Led technical implementation, testing, deployment, and troubleshooting.
- Improved backend workflows and system reliability through architecture and process improvements.
- Supported engineering teams with technical decisions, code review, and delivery planning.

Simin Software Co.

Lead Software Engineer & Technical Director

December 2000 - March 2019 (18 years 4 months)

Led the design and development of enterprise software, database systems, and internal business platforms.

- Designed and implemented enterprise MIS and business applications.
- Designed and administered Microsoft SQL Server databases for large-scale organizational systems.
- Developed desktop and backend software using Delphi, SQL, and related technologies.
- Led software architecture, database design, technical troubleshooting, and development teams.
- Managed technical delivery across long-term enterprise software projects.

Education

Mazandaran University of Science and Technology

Bachelor, Chemistry · (1988 - 1992)

Shiraz University E-Learning Center

Bachelor of Engineering, Computer Software Engineering · (2001 - 2005)
